

PROFESSIONAL SUMMARY

Backend-focused professional with 3+ years in operations and hands-on experience in Java and Spring Boot. Brings operational rigour, systems-thinking, and an instinct for anticipating failure to software development. Delivered 4 production-grade projects spanning API design, database management, and system optimisation. Seeking backend engineering roles where operational experience and technical depth add value.

TECHNICAL SKILLS

Languages	JAVA(Core Java, OOP, Collections, Exception Handling, Data Structures & Algorithms, Servlets, JSP)
Frameworks	Spring Boot (Microservices Architecture), Spring (IOC, MVC), Hibernate (ORM)
APIs and Testing	RESTful APIs, JSON, JUnit 5, XML, Postman, Open API 3 (Swagger)
Databases	PostgreSQL, SQL(CRUD Operations, Joins, Indexing), JDBC
Tools & Gen AI	Maven, GitHub, Eclipse IDE, AI Assisted Development (Copilot, Claude)
Concepts	Caching, Debugging, Log Analysis, Code Review, Query Optimization, SDLC, Agile Methodology
Additional Exposure	IBM Planning Analytics , Amazon Web Services (AWS), Excel (Formulas, Data Manipulation & Analysis), PowerBI

PROFESSIONAL EXPERIENCE

Support Operations Specialist | Amazon | 02/2025 - 08/2026 | Bengaluru, India

- Resolved 30+ complex FBA inventory, reimbursement, policy-related and operational cases for sellers daily with 100% accuracy while ensuring compliance with Amazon operational standards and seller policies.
- Performed investigations for lost, damaged, and reimbursement-related cases while maintaining SLA adherence and exceeding team KPIs to ensure highest Seller Experience.
- Created SOPs and optimized workflows for defect prevention and reconciliation, and case investigations, reducing new associate onboarding time by ~45% and improving team efficiency by ~48%.
- Mentored and trained 40+ new associates on operational processes, investigation standards, SOP adherence, and internal tools, enabling faster ramp-up, consistent quality and compliance delivery.
- Recognized as a top-performing Ops Associate for 6 months by exceeding SLA targets with accurate, high-volume case resolution.
- Conducted detailed root-cause analysis on recurring operational and seller-impacting issues, and delivered data-driven recommendations that reduced repeat cases by ~28% minimizing financial and compliance risks.
- Collaborated with cross-functional stakeholders to escalate systemic operational risks, improve seller compliance processes, and enhance overall FBA process improvements.

Student Success Specialist | BYJU'S | 09/2022 – 04/2024 | Bengaluru, India

- Managed a team of 10 mentors to deliver high-quality customer service while consistently meeting KPIs and SLAs.
- Led onboarding and training of new associates, improving integration, ramp-up speed, and overall team performance through structured mentoring and guidance.
- Created weekly rosters, maintained operational trackers, prepared performance reports for workforce and management planning.
- Monitored, analyzed, and reported daily escalations and performance trends to management, providing actionable insights for process improvement and service enhancement.
- Conducted high-volume outbound engagement calls (4+ hours talk time and 45+ connected calls daily), improving customer engagement and increasing conversion rates from 9% to 33% within 2 months.
- Handled inbound customer queries, troubleshooting issues related to tablets and e-readers, and managed escalations by coordinating with internal and external stakeholders for timely resolution.
- Ensured smooth operational support by maintaining service quality standards, resolving customer concerns efficiently, and supporting day-to-day coordination activities in a fast-paced environment.

Regional Reservations Associate | TAJ Group of Hotels (IHCL) | 06/2022 - 09/2022

- Managed end-to-end reservations for 5 Taj hotels across multiple channels - telephone, mail, fax, OTA, and central reservation systems - maintaining accurate records and ensuring seamless communication of updates, cancellations, and modifications to the front desk.
- Drove revenue optimization by determining strategic room rates and contributing to occupancy forecasts, leveraging in-depth knowledge of room categories, package plans, selling status, and credit policies.
- Delivered exceptional guest experience by responding promptly to inquiries, preparing confirmation letters, and arranging client travel programs, while researching seasonal trends to target new clientele and maintaining a courteous, professional rapport with guests, managers, and fellow employees.

CERTIFICATIONS

Java Backend Development Certification, JSpiders (JAVA Development Training Institute) | 05/2024 - 12/2024

- Core Java, Collections Framework, JDBC, Hibernate, Servlets and JSP, Spring (IOC, MVC and Boot), REST APIs, SQL

PROJECTS

Inventory Management [🔗](#), (JAVA · Spring Boot & MVC · PostgreSQL · Hibernate · Thymeleaf)

- Built a full-stack Inventory Management System (Spring Boot 4, PostgreSQL, Thymeleaf) with a clean layered architecture — DAO abstraction, dual REST/UI controllers, and a centralized Facade mapper for entity-DTO conversion and error-response building.
- Engineered secure paginated search with JPQL case-insensitive SKU/name matching, sort-field whitelisting, and full encapsulation of Spring's Page/Pageable behind a clean PagedResponseDto contract.
- Built exception hierarchy mapped to precise HTTP codes; deployed via multi-stage Docker on Render with dynamic PORT injection.

Weather App [🔗](#), (JAVA · Spring Boot 3.2 · Thymeleaf · PostgreSQL · OpenWeatherMap API · Docker · Render)

- Architected the service layer using Template Method and Facade patterns, cutting duplicate code by ~60%; reduced external API calls by ~90% via Caffeine cache with city-level key granularity.
- Wrote JUnit 5 + Mockito tests covering model validation, service error contracts (404/500 wrapping), and HTTP-layer behavior with @WebMvcTest + MockMvc — each layer tested without a live DB or server.
- Deployed to Render via multi-stage Docker (70% smaller image); designed search_history schema with JPA indexes and a custom JPQL aggregate query for a session-scoped history and trending-cities feature.

Co Work Space [🔗](#), (JAVA · Hibernate · Spring Boot · PostgreSQL)

- Designed a Co-Working Space management REST API using Spring Boot 3.1.4 and Java 17 with a layered architecture (Controller → Service → DAO → Repository), backed by PostgreSQL and Hibernate ORM for end-to-end workspace lifecycle management.
- Architected a 5-tier cascaded domain model (CoWorkSpace → Building → Floor → WorkSpace → Room) with parent-scoped CRUD endpoints, enum-based room classification (AC/NON_AC), and unique-constrained user management.
- Enforced consistent and predictable API behavior through a generic typed response wrapper, centralized global exception handling with domain-specific custom exceptions, and Swagger UI documentation — improving debuggability and API consumer experience.

Book Store [🔗](#), (JAVA · Spring Boot & MVC · PostgreSQL · Hibernate · HTML · CSS · JavaScript · Bootstrap)

- Built a production-ready full-stack bookstore with paginated product listing, search, and CRUD operations; containerized using multi-stage Docker builds with environment-driven config for cloud portability.
- Designed a clean 4-layer Java backend (Controller → Service → DAO → Repository) with custom exception handling, DTO pattern, and Thymeleaf-driven views handling book creation, updates, deletions, and file uploads.
- Optimized data retrieval by integrating Spring Data JPA with PostgreSQL, implementing runtime sorting and pagination to reduce manual SQL and handle large inventories efficiently at scale.

EDUCATION

M.Sc. Hospitality Administration (Sales and Marketing) | IHM, Bangalore (IGNOU) | Jul 2020 - Aug 2022 | Bengaluru, India

Percentage: 74% | Relevant Coursework: Consumer Behaviour, Business Research Methods, Data Analysis, Marketing Strategy

Academic Research Project (Oct 2021 – Apr 2022): **A Study of Growth, Brand Loyalty, and Customer Satisfaction Levels of E-**

Consumers - Analysed e-consumer growth, brand loyalty, and satisfaction using quantitative methods, structured questionnaires, and AI-assisted tools (ChatGPT) to generate data-driven insights and strategic recommendations.

B.Sc. Hospitality and Hotel Administration | IHM, Mumbai (IGNOU) | Jun 2016 - Jun 2020 | Mumbai, India

Percentage: 62.36% | Relevant Coursework: Front Office Operations, Food Production, Food & Beverage and Housekeeping Management

Academic Research Project (Dec 2018 - Mar 2019): **Innovative Flavors of Panipuri** - Explored and developed innovative flavor profiles for panipuri, conducting experimental trials and sensory evaluations across 20+ restaurants to assess consumer preferences and culinary viability.
