SUMMARY

Detail-oriented Operations Professional with extensive experience at Amazon in Support Operations and Investigation roles. Proven expertise in managing seller/vendor interactions, resolving inventory discrepancies, and conducting root cause analysis (RCA). Adept at delivering policy-driven outcomes within strict SLA timelines while maintaining high-quality compliance standards.

CORE COMPETENCIES

- **Operations & Case Management:** End-to-End Issue Resolution, SLA Adherence, Inventory Audits.
- **Quality & Compliance:** Process Audits, Quality Assurance (QA), SOP Implementation.
- **Data Visualization & Reporting:** Data Visualization, Dashboard Interpretation, Analytical Reporting, Insight Communication
- **Analysis & Communication:** Root Cause Analysis (RCA), Stakeholder Collaboration, Customer Obsession.
- **Technical Skills:** Java, Spring Boot, DSA, MS Excel (Data Management), SQL, MS Office Suite, CRM Tools.
- **Core Professional Skills:** Analytical Thinking, Problem Solving, Business Communication, Attention to Detail.

PROFESSIONAL EXPERIENCE

Support Ops Specialist | Amazon Development Centre India | 02/2025 - 08/2026 | Bengaluru, India

- Resolved 30+ complex FBA inventory, reimbursement, policy-related and operational cases for sellers daily with 100% accuracy while ensuring compliance with Amazon operational standards and seller policies.
- Performed investigations for lost, damaged, and reimbursement-related cases while maintaining SLA adherence and exceeding team KPIs to ensure highest Seller Experience.
- Created SOPs and optimized workflows for defect prevention and reconciliation, and case investigations, reducing new associate onboarding time by ~45% and improving team efficiency by ~48%.
- Mentored and trained 40+ new associates on operational processes, investigation standards, SOP adherence, and internal tools, enabling faster ramp-up, consistent quality and compliance delivery.
- Recognized as a top-performing FBA Support Associate for 4 consecutive months by exceeding SLA targets with accurate, high-volume case resolution.
- Conducted detailed root-cause analysis on recurring operational and seller-impacting issues, and delivered data-driven recommendations that reduced repeat cases by ~28% minimizing financial and compliance risks.
- Collaborated with cross-functional stakeholders to escalate systemic operational risks, improve seller compliance processes, and enhance overall FBA process improvements.

PROJECTS

Weather App [🔗](#), (JAVA · Spring Boot 3.2 · Thymeleaf · PostgreSQL · OpenWeatherMap API · Docker · Render)

- Designed and developed a full-stack weather application using Spring Boot, leveraging AI-assisted development tools to improve efficiency while implementing Template Method and Facade patterns to reduce code duplication by 60%.
- Cut third-party API calls by 90% via Caffeine caching; documented 6 endpoints with Swagger / OpenAPI 3.
- Deployed to Render via multi-stage Docker (70% smaller image) with automated PostgreSQL provisioning.

Co Work Space [🔗](#), (JAVA · Hibernate · Spring Boot · PostgreSQL)

- Backend RESTful API services for user registration and login, following a layered architecture (Controller, Service, Repository).
- Implemented role-based access control to manage user permissions and secure application endpoints.
- Utilized PostgreSQL with Hibernate for efficient object-relational mapping and seamless database interaction

Inventory Management [🔗](#), (JAVA · Spring Boot & MVC · PostgreSQL · Hibernate · Thymeleaf)

- Used Spring's abstraction layer with clean MVC separation delivering CRUD operations with dynamic pagination and sorting.
- Integrated Hibernate ORM to abstract raw SQL, managing entity-to-table mapping between Java and PostgreSQL.
- Rendered dynamic server-side views, enabling seamless model-to-view data binding within the MVC architecture.

M.Sc. Academic Project, Bengaluru (Oct 2021 - Apr 2022),

A Study of Growth, Brand Loyalty, and Customer Satisfaction Levels of E- consumers.

Studied E-consumer growth, loyalty, and satisfaction using quantitative questionnaire analysis and AI tools like ChatGPT, generating insights and recommendations to improve engagement, retention, and marketing strategy.
